2-Aug-23 9:58 am @EWT 76° F

What happened? Am I losing it? I just remembered I had not typed anything for the newsletter this time and it is the 22-Aug already.

So, I put it in my Flash Drive and the is nothing on it! So, I put my other Fash drive and the was not past newsletters either! Oh, corn kernels!

I made a backup of my Cloud so I could recreate it. I guess I can't use that backup.

I wonder about this template, will it be, ok? It was created on 30-Jan-22.

Anyway

I have my track wired and some of it is out where I can get to the end so I can test some of it.

If all goes well, I can work on the control panel for all the tracks. The next thing would be the turnout servos. This will take some work and I must be on both the top and bottom of the layout at the same time.

Once the turnout servos are set up, I will start working on the control panned for the turnouts.

I need to think about the control panel. I think it might be 11" x 17" the get all the power for the track, the LED showing which track has power, and the controls for the turnouts.

I just remembered I have most of the 34 sections of the track to power and about 28 turnouts. Boy is that a lot of wire!

Garden

I have harvested some Eggplant, carets, and beets. You know, they like it when I water them. I must water them every other day.

My Car

I need to take my car in to be checked out, there are many, many things to be looked at. If this is going to cost too much I think about a new car.

Things I know about Windshield switches, Tires, Brakes, Shocks, and there is a Squawk in the front end. I don't know what that is.

More

My Lawn needs Mowing! I have only cut the back once this year.

Petra is coming to Woodstock on the 6 of September for a few days. Cork will pick her up from the Airport and she will be staying with Tammy.

I am sure there is a lot more going on too!

27-Aug-23 7:19 am @home 63° F

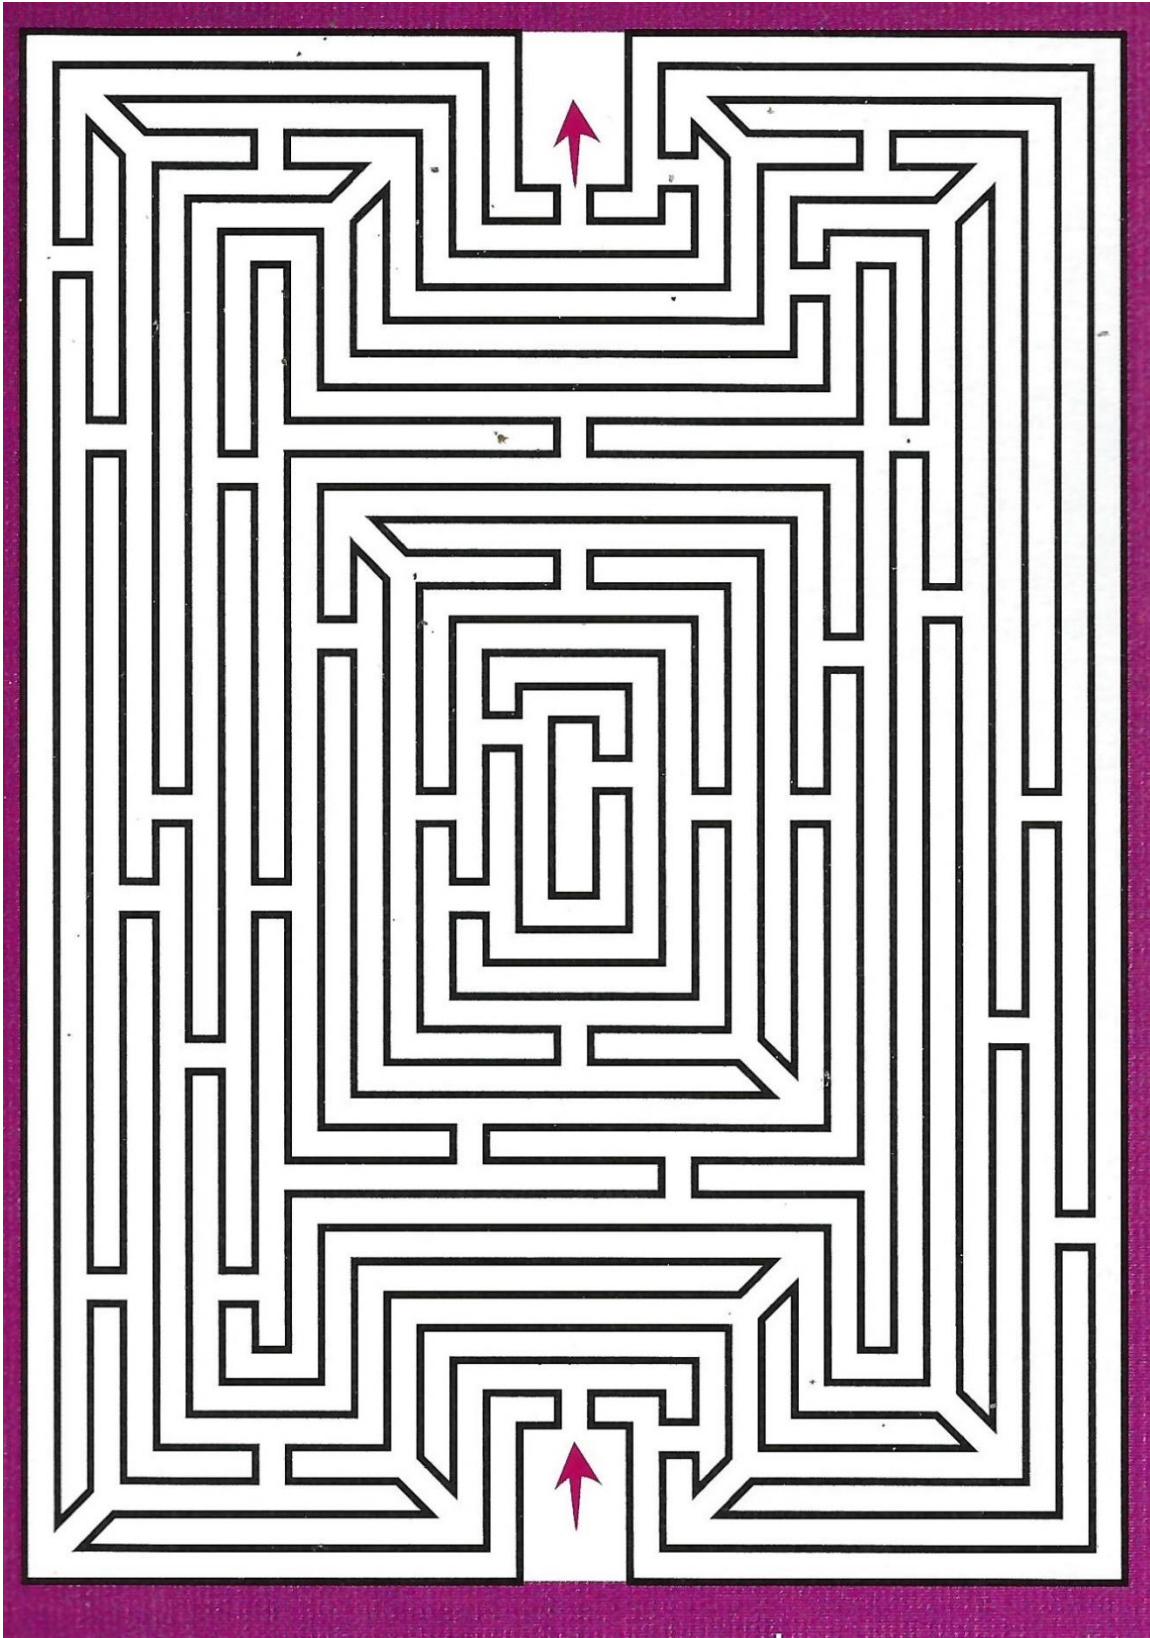

This has been a long month! Seems the more I work on it the more there is to do.

So, here I sit when I should be out eating breakfast.

So, I will be capping off this issue and trying and get some more of this stuff done.

Wait, here is an example of what I am going through.
